INFRASTRUCTURE SERVICES

Bringing efficiency and simplicity across your IT landscape

Tight budgets force IT managers to make tough choices. Do you spend staff time on time-consuming helpdesk issues, troubleshooting and remediation? Or do you use those resources to develop tools and services that advance your business initiatives?

Put us to work to tackle your IT challenges.

Powermatla ICT combines infrastructure management with SaaS applications to optimize performance and availability and quickly remediate issues. And, even as we manage your IT operations, you retain complete control and transparency.

Our Infrastructure Management services include:

- Data Center Infrastructure Management, monitoring and optimizing data center resources 24/7
- End-user computing, customized workspace services that significantly improve data management, productivity, processes and security across your company
- Application Support to continually optimize application availability and performance
- Technical Support that incorporates customer profiling and predictive analytics to remote and on-site services portfolio
